## SOFT TEXTILE PROFILES

SlimTEX XPO: Modular stand system with soft textile,  
PVC flexface or rigid sheet | P.6

SlimTEX 3D: soft textile for structures | P.10

SlimTEX: Soft textile for textile decoration, with sewn tape | P.12

Q|TEX: Soft textile for textile/canvas decoration | P.20

## PVC FLEXFACE PROFILES

LUMI-SIGN: Flex face signs, clip tension | P.24

LUMI-GRIP: Flex face signs, front insertion | P.26

ECOFLEX: Flex face frames, strip tension | P.30

WIND: Profiles for suspended advertising | P.34

## ACRYLIC FACE PROFILES

ECONOBOX: Acrylic lightboxes | P.38

ECONOCLIP: Acrylic lightboxes | P.40

FLAT PROFILES: Acrylic lightboxes | P.42

Sheet frame profiles | P.44

## CHANNEL LETTER

Stand-off brackets for letters | P.43

Contour profiles for acrylic letters | P.43

H profile for acrylic | P.43

## FRAME PROFILES

Standard aluminium profiles | P.46

Connectors for aluminium frame construction | P.46

## WAYFINDING SIGNAGE

GRAFOLIGHT SLALOM: Curved aluminium slats | P.50

GRAFOLIGHT ELITE: Aluminium slats and directories | P.52

# Soft textile profiles

# SLIM.TEX XPO

SOFT TEXTILE PROFILES FOR STANDS

*Slim.tex XPO is a profile system that allows the use of textile with silicone, bead-tensioned canvas and also rigid panels.*

*This makes it an extremely flexible system with infinite possibilities and applications.*

*The standard modules -sold as kits- are assembled without tools in very little time, for stands, photocalls, furniture, interior partitions, totems, changing rooms for pop-up stores and many other structures, with or without illumination.*

*The same bar profile is used to manufacture custom frames for interior use with textile, exterior use with tensioned canvas, suspended illuminated ceilings, wall cladding, with or without insulation, etc.*

## Slimtex XPO

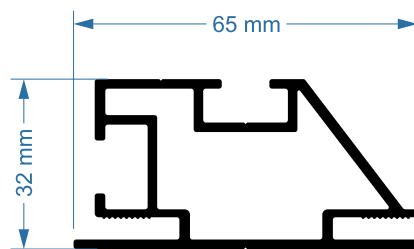

### SLIMTEX XPO 65 PROFILE (P3X-65N6)

Profile for LED-illuminated frame.

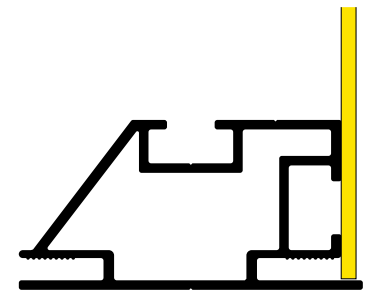

Assembly with 4 P3X-00EQ corner brackets.

Edgelit or backlit. Depth: 65 mm.

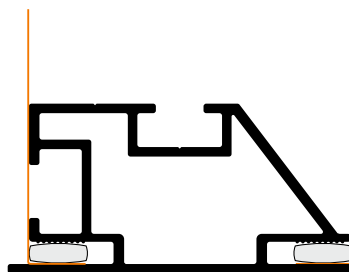

Profile P3X-65N6

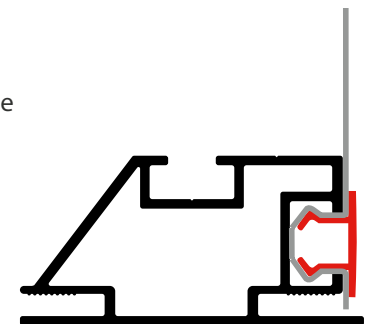

Assembly with 3mm rigid panel front

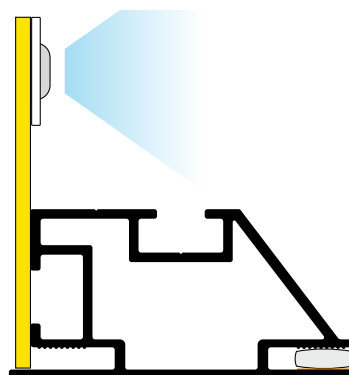

Assembly 2 textile sides with silicone

Assembly with Ecoflex tension strip and flex face

Assembly 1 textile side with backlit LED.

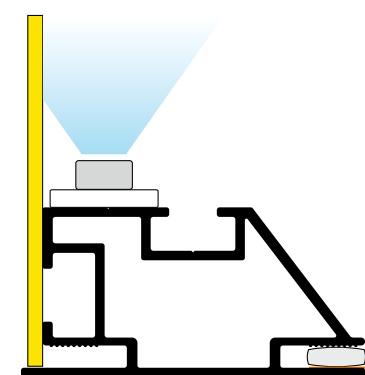

RECOMMENDED LED

BACKLIT

Backlit strip (20 cm between lines)

Assembly 1 textile side with perimeter LED

RECOMMENDED LED

EDGELIT

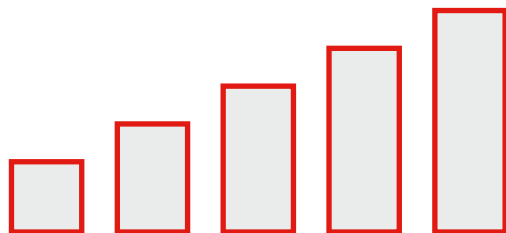

Strip ICTPR050 (< 130 cm wide)

Slimtex S210

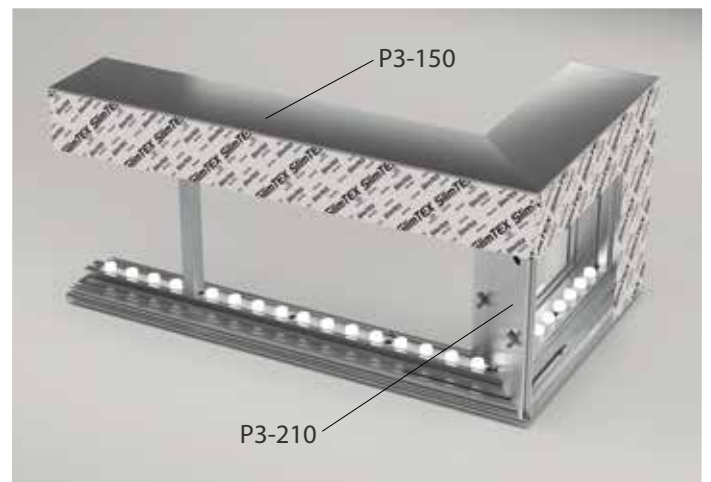

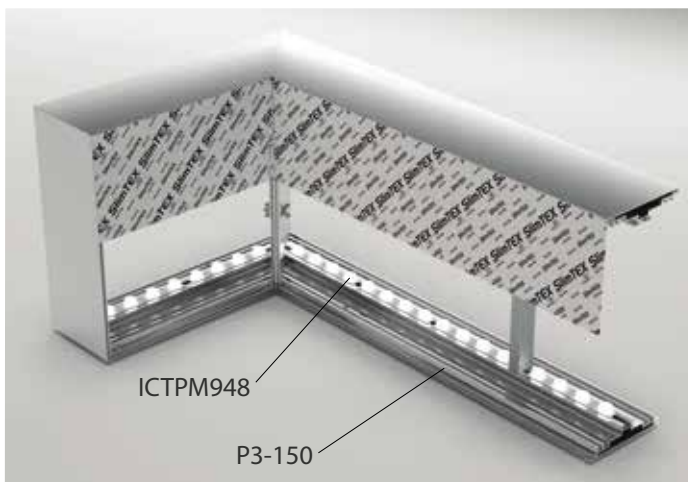

Corner bracket  
P321E090

## 3D STRUCTURES WITH SLIMTEX S150

The S150 profile, together with the S210 corner profile, allows building three-dimensional totems and double sided truss-suspended satellites for stands, illuminated or not.

- Easy to transport, assemble and disassemble. Reusable.
- Optional custom kit delivery.
- Can include exterior or interior illumination (double-sided).
- Illumination with HO perimeter strip (ICTPMxxx).
- Uniform illumination up to 4 meters height.
- 4 x 90° brackets per corner (P321E090).
- Angles other than 90° upon request.
- Structures with 1, 2, 3 or 4 sides.
- Suspended with eyebolts.
- Vertical connecting crossbars.

## SOFT TEXTILE PROFILES

*Slimtex transforms the way frames are created for commercial spaces, offices, events and trade shows. Its silicone edge system, sewn or bonded to the graphic, allows visuals to be changed in seconds with total ease. The Slimtex range includes single and double-sided frames, illuminated or not, in multiple depths. New profiles unlock endless design possibilities—from stands and cubes to arches, complex structures and seamless combinations of rigid panels and textiles.*

Q|tex is a simple tension system that allows creating frames for photos or artistic canvases for private, commercial and office use.

With concealed subframe or aluminium frame. No tools required for assembly. Additionally, the image can be changed effortlessly as many times as needed.

Recommended printing substrates: any canvas, textile or fabric between 125 and 270 g/m<sup>2</sup>.

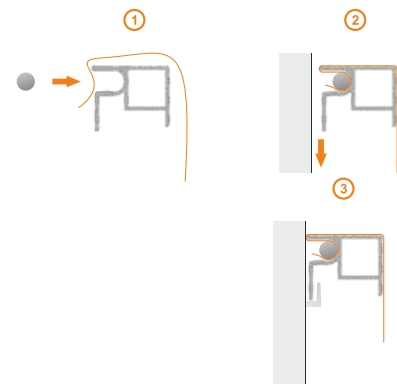

### Q1 SUBFRAME PROFILE (NQ0001\_)

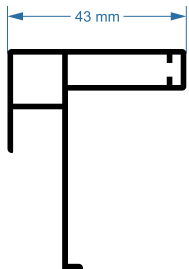

Aluminium profile for mounting canvas on frame.

By wrapping the subframe with printed fabric, an artistic piece is achieved very decorative and three-dimensional.

In 3m bars.  
20 x 25 mm.

Code	Description	Sales unit
NQ0001N0	Qtex Q1, concealed subframe profile, mill aluminium	l.m.
P7-000EQ	ECOFLEX, mounting bracket / grey ABS	unit
NQ000565	Qtex, silver PVC cord Ø6.5mm, 50m roll	roll

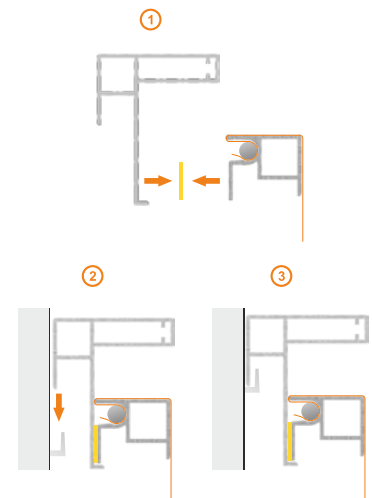

### Q3 EXTERIOR SURROUND PROFILE (NQ0003\_)

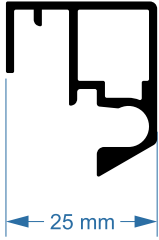

Visible exterior aluminium surround profile.

Enhances the visual impact of the Q1 frame by adding the Q3 frame to the perimeter.

Q|tex Q3 is NOT a tension profile. It is a finishing profile to be used together with Q1.  
In 3m bars. 43 x 53 mm.

Code	Description	Sales unit
NQ0003N0	Qtex Q3, perimeter frame profile mill aluminium	l.m.
NQ0003AP	Qtex Q3, perimeter frame profile silver anodised	l.m.
P7-000EQ	ECOFLEX, mounting bracket / grey ABS	unit
NQ00EQAL	Qtex, Q3 frame alignment bracket	unit

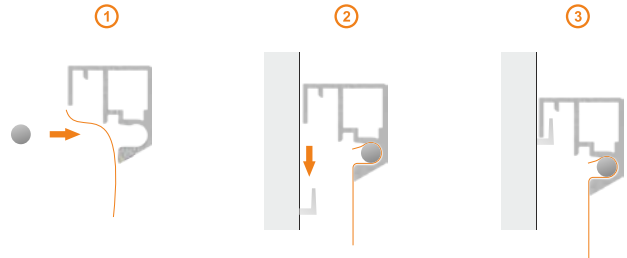

### Q2 VISIBLE ALUMINIUM FRAME PROFILE (NQ0002\_)

Visible aluminium frame profile.

Together with manual tool-free assembly offers flexibility with multiple decorative options.

In 3m bars.

25 x 29 mm.

Code	Description	Sales unit
NQ0002N0	Qtex Q2, visible frame profile mill aluminium	l.m.
NQ0002AP	Qtex Q2, visible frame profile silver anodised	l.m.
P7-000EQ	ECOFLEX, mounting bracket / grey ABS	unit
NQ000565	Qtex, silver PVC cord Ø6.5mm, 50m roll	roll

# PVC Flex face Profiles (Tension clip)

# LUMI-SIGN

## FLEXIBLE FACE SIGNS

Lumi-Sign is a versatile system designed for the production of lightboxes with flexible faces, illuminated or non-illuminated. It offers a comprehensive range of profiles to suit every application, with compatibility for both plastic and aluminium clips—ensuring maximum flexibility in assembly.

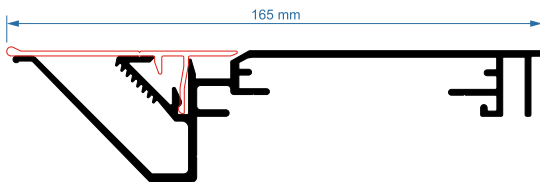

Both frames and the Retro profile can be curved, opening the door to creative, shaped and fully customized signage solutions.

### LUMI-SIGN 135 mm (SC8135N6)

Flexible face single side lightbox, body frame. Depth: 135 mm. Recommended for lightboxes up to 2 m high. Flat or angle cover.

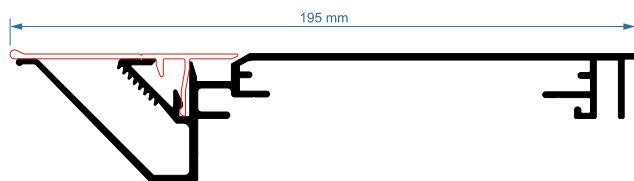

Code	Description	Sales unit
SC8135N6	Lumi-Sign, profile 135 mm mill aluminium	bar 6 m
SC8135L6	Lumi-Sign, profile 135 mm white lacquered aluminium	bar 6 m
SC710900	Lumi-Sign, reinforcement bracket profile SC8135	unit
SC745000	Lumi-Sign, mounting corner bracket para SC8135	unit
SC745100	Lumi-Sign, joint for SC8135	unit
SC745200	Lumi-Sign, 90° corner joint for SC8135	unit

### LUMI-SIGN 165 mm (SC8165N6)

Flexible face single side lightbox, body frame. Depth: 165 mm. Recommended for lightboxes up to 3.5 m high. Flat or angle cover.

Code	Description	Sales unit
SC8165N6	Lumi-Sign, profile 165 mm mill aluminium	bar 6 m
SC8165L6	Lumi-Sign, profile 165 mm white lacquered aluminium	bar 6 m
SC710700	Lumi-Sign, reinforcement bracket profile SC8165	unit
SC746000	Lumi-Sign, mounting corner bracket para SC8165	unit
SC746100	Lumi-Sign, joint for SC8165	unit
SC746200	Lumi-Sign, 90° corner joint for SC8165	unit

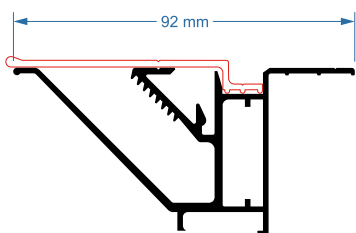

### LUMI-SIGN 195 mm (SC8195N6)

Flexible face single side lightbox, body frame. Depth: 195 mm. Recommended for lightboxes up to 5 m high. Flat or angle cover.

Code	Description	Sales unit
SC8195N6	Lumi-Sign, profile 195 mm mill aluminium	bar 6 m
SC8195L6	Lumi-Sign, profile 195 mm white lacquered aluminium	bar 6 m
SC710500	Lumi-Sign, reinforcement bracket profile SC8195	unit
SC740000	Lumi-Sign, mounting corner bracket para SC8195	unit
SC740100	Lumi-Sign, joint for SC8195	unit
SC740200	Lumi-Sign, 90° corner joint piece for SC8195	unit

# LUMI-SIGN

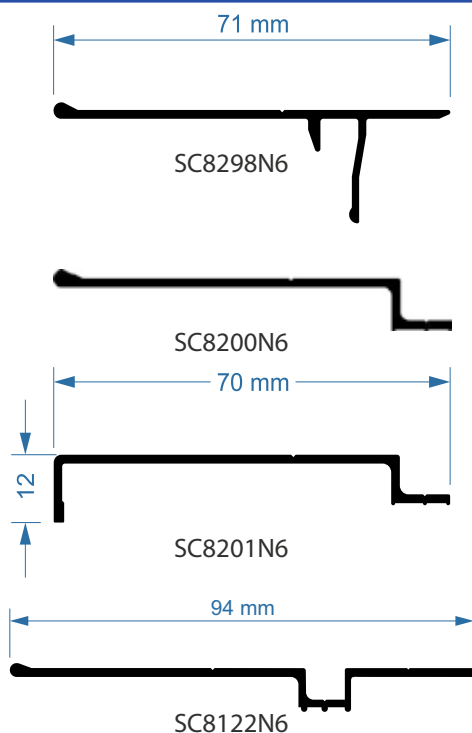

## FLEXIBLE FACE SIGNS

### LUMI-SIGN RETROFIT TENSION PROFILE (SC8105N6)

Flexible face tension profile, on existing structure.  
Compatible with all Lumi-Sign SC8xxx covers.

Code	Description	Sales unit
SC8105N6	LumiSign, retrofit tension profile, mill aluminium	bar 6 m
SC8105L6	LumiSign, retrofit tension profile, white lacquered aluminium	bar 6 m
SC521000	LumiSign, corner key for retro profile	unit
ZFA125N6	Crossbar profile 25 x 12 mm, mill aluminium	bar 6 m
SC521100	LumiSign, flat joint for retro profile	unit

### CLIP ON FLAT COVER (SC8298N6)

Cover compatible with all SC8xxx profiles.  
Clip on assembly. Can also be screwed.

### SCREW FIX FLAT COVER

Cover compatible with all profiles SC8xxx.  
Screw fix.

### SCREW FIX ANGLE COVER

Cover compatible with all profiles SC8xxx.  
Screw fix.

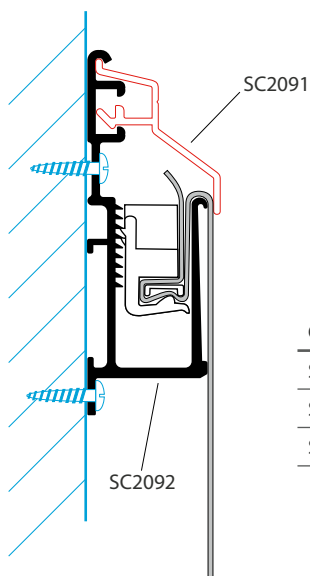

### SCREW FIX FLAT COVER FOR RETRO PROFILE (SC8122N6)

Screw fix cover that fully covers the SC8105N6 profile.  
Not compatible with other Lumi-Sign profiles.

Code	Description	Sales unit
SC8298N6	Clip on flat cover, mill aluminium	bar 6 m
SC8298L6	Clip on flat cover, white lacquered aluminium	bar 6 m
SC8200N6	Screw fix flat cover, mill aluminium	bar 6 m
SC8200L6	Screw fix flat cover, white lacquered aluminium	bar 6 m
SC8201N6	Screw fix angular cover, mill aluminium	bar 6 m
SC8201L6	Screw fix angular cover, white lacquered aluminium	bar 6 m
SC8122N6	LumiSign, flat cover for retrofit, mill alum.	bar 6 m
SC8122L6	LumiSign, flat cover for retrofit, white lac. alum.	bar 6 m

# LUMI-SIGN

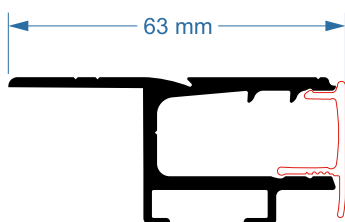

## FLEXIBLE FACE SIGNS

### FACADE FRAME (SC2092N6 + SC2091N6)

Large format flexible face frame.  
Non-illuminated frame for PVC flex face.  
Allows large-format signs.  
SC2091 cover.

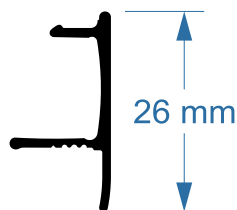

Code	Description	Sales unit
SC2092N6	Large format flexible face frame, body frame	bar 6 m
SC2091N6	Clip on cover - Mill aluminium	bar 6 m
SC2091L6	Clip on cover - White lacquered aluminium	bar 6 m

### LUMIGRIP TENSION PROFILE (P61007N6 + P61010N6)

Flexible face tension profile, on existing structure.  
Front insertion profile.  
*Only compatible with aluminium tension clip P8909500.*

Code	Description	Sales unit
P61007N6	L-GRIP, front insertion profile / mill aluminium	bar 6 m

### LUMIGRIP FRAME COVER (P61010N6)

Cover compatible with LumiGrip profile. Clip on assembly, no screws.

Code	Description	Sales unit
P61010N6	L-GRIP, 24mm clip on cover / mill aluminium	bar 6 m

# LUMI-SIGN

ZFA125N6	Crossbar profile 25 x 12 mm, mill aluminium	bar 6 m
SC513500	Tensioning tool	unit
SC513700	Tensioning tool for SC2092	unit
SC513800	Tensioning tool for SC2092 narrow access	unit
P919-3DT	Alu clip assembly pliers	unit
SC7500N3	Corner tension profile, mill aluminium	bar 2.5 m
SC7700N3	Outer corner cover profile, mill aluminium	bar 2.5 m
SC7600N3	Inner corner cover profile, mill aluminium	bar 2.5 m
SC7550N3	Flat cover profile, mill aluminium	bar 3 m

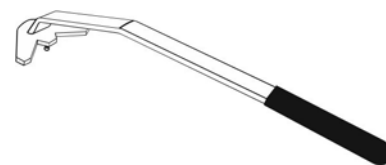

### Tensioning tools

SC513500  
All systems except facade frame.

SC513700  
For tensioning the facade frame.

SC513800  
For tensioning the facade frame in narrow access locations.

# LUMI-SIGN

## FLEXIBLE FACE SIGNS

### A solution for every application

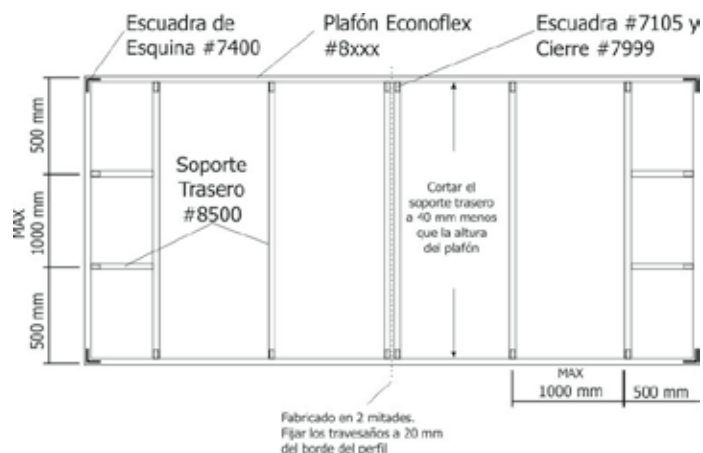

MODEL	CODE	DEPTH	H max	L max	1/2 SIDES	ILLUMINATED	NON-ILLUMINATED	RETROFIT	ALUMINIUM CLIP	PLASTIC CLIP	REMARKS
Lightbox 135	SC8135	135 mm	2m	∞	1	√	-	-	√	√	
Lightbox 165	SC8165	165 mm	4m	∞	1	√	-	-	√	√	
Lightbox 195	SC8195	195 mm	8m	∞	1	√	-	-	√	√	Large-format illuminated lightbox
Retro profile	SC8105	-	5m	∞	1/2	-	-	√	√	√	Assembly on existing frame
Facade Frame	SC2092	30 mm	5m	∞	1	√	√	-	√	√	
LGrip Retro	P61007	-	5m	∞	1/2	-	-	√	√	-	For front insertion sign

### Modular signs

- Manufacturing large-format signs is possible with the Lumi-Sign profile range.
- Module design between 3 and 4 metres maximum length is recommended, to simplify transport and allow installation with just two people. Consider the transport method to define module size.
- A sign can be split into modules both in length and height.

Sign height	Module height	Module length
> 1 m	Total height	3 - 4 m
1 to 2 m	Total height	3 - 4 m
2 to 3 m	Total height	2 m
3 to 4 m	Total height	2 m
4 to 5 m (1)	Total height	1,5 m
4 to 5 m (2)	Total height / 2	3 m

From 4 metres height, the height can be made in one piece or split into two modules.

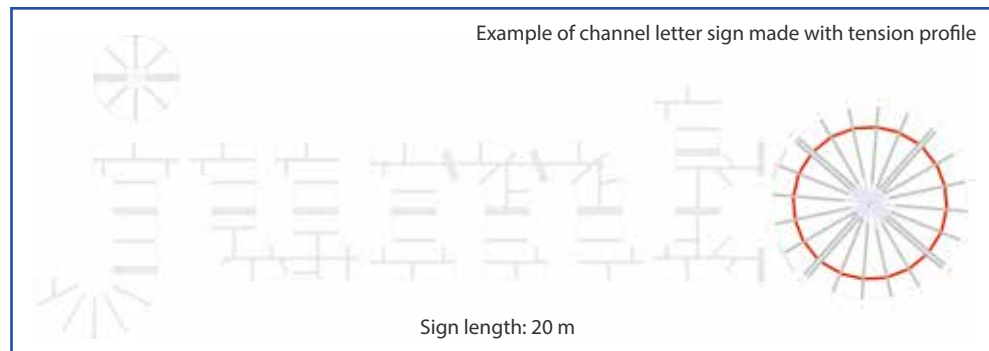

# LUMI-SIGN

## FLEXIBLE FACE SIGNS

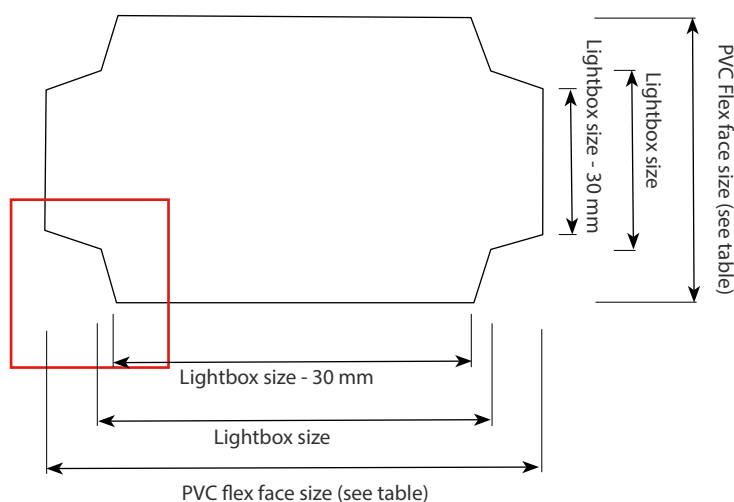

### Shaped signs

- The lightbox and Retro profiles can be curved for large-format PVC flex face signs with complex shapes.
- Through radial cuts in the inner side, the profile can be adapted to the required shape. The profile is then fixed by welding.
- The distance between cuts is determined by the defined bending radius.

### Canvas preparation

#### Flexible front cutting

#### Flexible front face size per profile

Profile	PVC size with plastic clip	PVC size with aluminium clip
Lightbox 195 mm Lightbox 165 mm Lightbox 135 mm Hinge lightbox Retrofit profile	Lightbox size + 180 mm	Lightbox size + 110 mm
Facade frame	Lightbox size + 80 mm	Lightbox size (+ 0 mm)
LumiGrip	Not compatible	Lightbox size + 45 mm

# ECOFLEX

## PVC FLEX FACE - TENSION STRIP

Ecoflex is a high-performance tension system for flexible graphics, offering one of the most versatile solutions on the market. Achieve perfectly tensioned visuals quickly and effortlessly—ideal for temporary signage and architectural applications. From façade coverings and large-format signage to exhibition stands, POS displays, ceiling cladding and vehicle graphics, Ecoflex adapts to any project. Recommended for fabrics up to 500 g/m<sup>2</sup>.

### EC PROFILE, 20 x 9 mm (P7-00CN3)

Used in small and medium format frames, for vehicle signage and adaptation to any existing structure. Hand-bendable. 1 groove.

Code	Description	Sales unit
P7-00CN3	ECOFLEX, "EC" profile, 20x9mm / mill aluminium	bar 3.03 m

### EKTA PROFILE, 27 x 9 mm (P7-KTAN3)

Used in small and medium format frames. 1 groove.

Code	Description	Sales unit
P7-KTAN3	ECOFLEX, "EKTA" profile / mill aluminium	bar 3.03 m

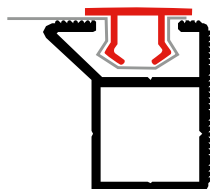

### EKTA PLUS PROFILE, 34 x 10 mm (P7-KA+N3)

Thanks to its strength, it allows medium and large non-illuminated façade frames. 1 groove.

Code	Description	Sales unit
P7-KA+N3	ECOFLEX, "EKTA PLUS" profile / mill aluminium	bar 3.03 m

# ECOFLEX

## PVC FLEX FACE - TENSION STRIP

### EKTN PROFILE, 22 x 20 mm (P7-KTNN3)

Designed for frames with 21 mm depth to small and medium format frames.  
1 groove.

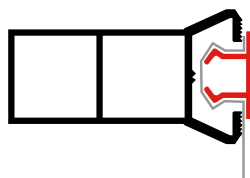

Code	Description	Sales unit
P7-KTNN3	ECOFLEX, "EKTN" profile, 21mm / mill aluminium	bar 3.03 m
P7-000EQ	ECOFLEX, mounting bracket / grey ABS	unit
P7-0TUN3	ECOFLEX, tube Ø12mm / mill aluminium	bar 3.03 m

# Profiles for Acrylic face

# ECONOBOX

## PROFILES FOR ACRYLIC FACE

EconoBox is smart profile systems for rigid panels, designed to create single and double-sided lightboxes with maximum efficiency.

EconoBox offers a simple and cost-effective solution.

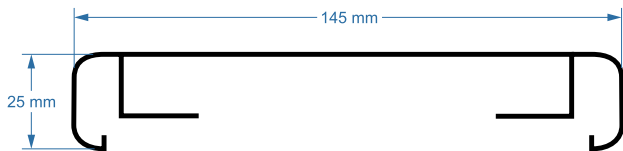

The system use standard inner structures—easy to source, easy to assemble, and built for reliable performance.

### LIGHTBOX 120 mm (PBB101N6)

Profile for single sided acrylic lightbox. Depth: 120 mm. Available in mill aluminium, white and black lacquered.

Code	Description	Sales unit
PBB101N6	EconoBOX, single sided frame 120mm / mill aluminium	bar 6 m
PBB101L6	EconoBOX, single sided frame 120mm / white lacquered	bar 6 m
PBB101K6	EconoBOX, single sided frame 120mm / black lacquered	bar 6 m

### LIGHTBOX / BANNER 145 mm (PBB102N6)

Profile for single/double sided acrylic lightbox. Depth: 145 mm. Available in mill aluminium, white and black lacquered.

Code	Description	Sales unit
PBB102N6	EconoBOX, double sided frame 145mm / mill aluminium	bar 6 m
PBB102L6	EconoBOX, double sided frame 145mm / white lacquered	bar 6 m
PBB102K6	EconoBOX, double sided frame 145mm / black lacquered	bar 6 m

### MOUNTING CORNER BRACKET

Mounting corner bracket for 90° right-angle corners.

Mounting corner bracket for rounded corners in 145 mm frame depth.

Code	Description	Sales unit
PBB10301	EconoBOX, 83 mm corner bracket for 120 mm profile	unit
PBB10302	EconoBOX, 115 mm corner bracket for 145 mm profile	unit
PBB10411	EconoBOX, rounded corner set 145 mm profile, mill aluminium	unit

# ECONOBOX

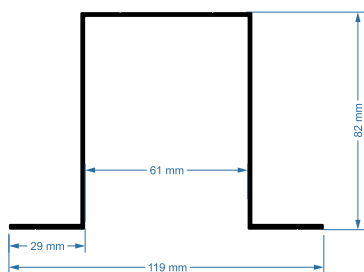

## PROFILES FOR ACRYLIC FACE

### LIGHTBOX REINFORCEMENT BRACKET (PBB10101)

Reinforcement bracket for crossbar.  
For 120 and 145 mm lightboxes.

Code	Description	Sales unit
PBB10101	EconoBOX, lightbox reinforcement bracket	unit
PBB10112	EconoBOX, flat extension piece 120 mm profile	unit
PBB10212	EconoBOX, flat extension piece 145 mm profile	unit

### STAND-OFF BRACKET (PBA212N3)

Stand-off bracket profile for double sided signs, below 1 m<sup>2</sup>.  
Available in mill aluminium, white and black lacquered.

Code	Description	Sales unit
PBA212N3	Stand-off bracket profile, mill aluminium	bar 3 m
PBA212L3	Stand-off bracket profile, white lacquered	bar 3 m
PBA212K3	Stand-off bracket profile, black lacquered	bar 3 m

### REINFORCEMENT CROSSBAR (ZFA125N6)

Allows vertical reinforcement of 120 mm lightboxes.  
Used together with the PBB10101 bracket.  
25 x 12 mm.

Code	Description	Sales unit
ZFA125N6	Crossbar profile 25 x 12 mm, mill aluminium	bar 6 m

### DOUBLE SIDED REINFORCEMENT

To fix also lighting fixtures in the lightbox.  
PBB10115: Crossbar support bracket, 115 mm  
ZFA15LN6: Crossbar profile

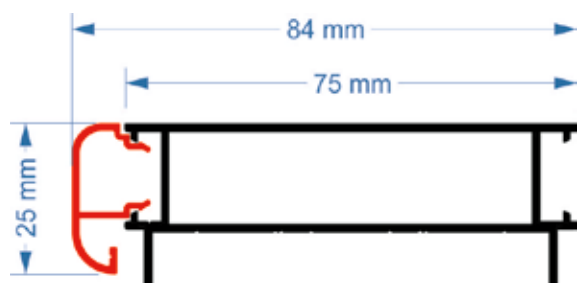

Code	Description	Sales unit
PBB10115	EconoBOX, lightbox crossbar support angle, 115mm	unit
ZFA20LN6	Angle profile 20x20x1.5 mm, for crossbar	bar 6 m

# ECONOCLIP

## PROFILES FOR ACRYLIC FACE

*ECONOCLIP is a profile system for construction of single and double sided lightboxes, with rigid face and clip on fixing. ECONOCLIP features a clip on cover system with one frame and interchangeable covers for easy access and maintenance.*

*The cap clips onto the main profile, allowing signs with front acrylic insertion.*

### SINGLE SIDED LIGHTBOX 84 mm (PBB105N6 + PBB106N6)

Single sided acrylic lightbox + cover.

Depth: 84 mm.

Available in mill aluminium, white and black lacquered.

Acrylic: max 4 mm.

Back panel: max 3 mm.
